

## Window 8 UAC

GreenScapes is compatible with Windows 8 and work just fine once the UAC is turned off and the imaging software is ran as the administrator. At this time we are not sure why it has to be run as administrator even thou you are the administrator of your computer.

1. First you need to access the control panel move your mouse to the right edge of the screen to get the search menu, Select on Search on the top.
2. Select Apps when the menu appears.

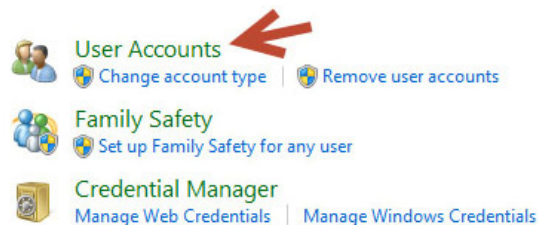

3. Find the Control Panel under Windows System and select on it. This brings up the control panel options.

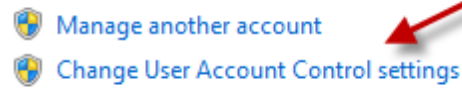

4. Select "User Account and Family safety" from the upper right.

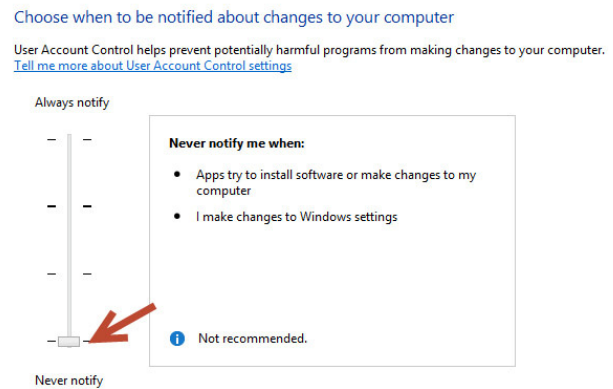

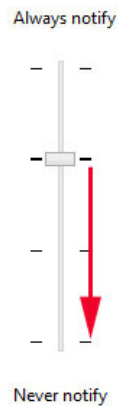

5. Then select on User Accounts

6. Select "Change user Account Control settings"

7. Now you will see a slider - click and drag it to the bottom to "NEVER NOTIFY" then click OK, in order for it to take effect you need to re-boot the computer.

Now install GreenScapes.

Now you have turned off the UAC, the last step is to run as admin. Go to the program shortcut on the desktop,

8. Hoover your mouse over the Shortcut icon and right click to bring up the menu. Select on "Run as administrator" the program registration screen will come up. and you will see you registration code.
